IN THE HEART OF DEAR OLD EMORY
WHERE THE SUN DOTH SHINE,
THAT IS WHERE OUR HEARTS ARE TURNING
'ROUND OLD EMORY'S SHRINE.

WE WILL EVER SING THY PRAISES,
SONS AND DAUGHTERS TRUE.
HAIL WE NOW OUR ALMA MATER,
HAIL THE GOLD AND BLUE!

THO' THE YEARS AROUND US GATHER,
CROWNED WITH LOVE AND CHEER,
STILL THE MEMORY OF OLD EMORY
GROWS TO US MORE DEAR.

WE WILL EVER SING THY PRAISES,
SONS AND DAUGHTERS TRUE.
HAIL WE NOW OUR ALMA MATER,
HAIL THE GOLD AND BLUE!

EMORY COLLEGE OF ARTS AND SCIENCES ORIGINATED FROM a concern for higher education in a Christian setting on the part of the Georgia Conference of the Methodist Episcopal Church. Chartered in 1836 in Oxford, Georgia, the college was named after John Emory (1789–1835), bishop of the Methodist Episcopal Church. In 1964 the college at Oxford was named Oxford College of Emory University.

Emory College became Emory University by virtue of a charter granted by the Superior Court of DeKalb County on January 25, 1915. Although classes on the Atlanta campus were begun in the schools of law and theology as early as 1916, the college did not move to Atlanta until 1919. The university now includes nine schools, most tracing their origins to years before the chartering of the university itself. These schools are Emory College and Oxford College (1836), the School of Medicine (1854), Nell Hodgson Woodruff School of Nursing (1905), Candler School of Theology (1914), the School of Law (1916), Roberto C. Goizueta Business School (1919), the James T. Laney School of Graduate Studies (1919), and Rollins School of Public Health (1990).

The intent of the founders is perpetuated by the university's vision statement: A destination university internationally recognized as an inquiry-driven, ethically engaged, and diverse community, whose members work collaboratively for positive transformation in the world through courageous leadership in teaching, research, scholarship, health care, and social action.

A SHORT HISTORY OF COMMENCEMENT AT EMORY

This is Emory's 175th commencement. The exercises represent an imposition of medieval academic tradition on an institution that had its roots in the nineteenth-century frontier. The first Emory commencement was held in 1840, four years after Emory College had been chartered and two years after the college's first classes. That first ceremony, however, was without graduating students, as there were no graduates until the following year. Then, as now, sermons and addresses had a central focus in the exercises, though rarely have these addresses been so crucial as in 1849, when all fifteen members of the graduating class were assigned speaking places and spoke for as long as half an hour each.

Early commencement audiences sat for up to four hours in the midsummer heat to listen to the numerous student and faculty orations on such topics as "Our Government Unfavorable to High Attainment in Literature," "Social Equality," and "Modern Refinements." These addresses in the early days were in English, contrary to the practice at many other institutions. As President A. B. Longstreet argued in 1842, speeches in Latin and Greek were "worthy of the name pedantry, and nothing more." In spite of this advice, several later generations of students instructed their audiences in the ancient tongues.

ACADEMIC DRESS AND CUSTOMS

Academic dress goes back to the founding of European universities, which were the products of the intellectual revival of the twelfth century. All medieval students were clerks and consequently wore the dress of clergy. This is the academic costume we wear today, with certain changes introduced in the sixteenth century by Protestant reformers. The oldest articles of academic wear were the robe, over which was worn the habit, usually a kind of tunic with short, wide sleeves. The medieval hood was lined with fur or inexpensive skins and could be gathered around the neck or pulled up on the head as a turban. It is uncertain when different colors became associated with different degrees.

There were four kinds of caps: the round cap, reserved for doctoral dignity; the *tena*, a round cap with strings tied under the chin, worn by jurists; the square cap; and the Tudor bonnet. At Oxford University in 1565 the square cap became the norm, but the faculties that had become laicized adopted the Tudor bonnet that is still worn by doctoral candidates today. The basic design of all academic costume in the United States was first established in 1895 and was first used at Emory by the Class of 1902. The bachelor's gown features an embroidered Emory University seal in gold thread and has long, pointed, open sleeves. The master's gown has longer sleeves, which are closed at the bottom with openings about midway for the hands. Beginning in 2014, the bachelor's and master's gowns are made of fabric spun from molten plastic pellets from recycled water bottles. An average of twenty-three post-consumer plastic bottles are used to create each gown, furthering Emory's commitment to sustainability initiatives. The doctor's gown has full-length lapels of velvet and bell-shaped sleeves with three horizontal velvet bars. Tassels for bachelor's and master's caps are black; tassels of gold thread may be worn by doctors. Gowns and caps are usually black, although Emory and some other schools have specified that their doctors may wear gowns of distinctive colors. Yale's deep blue doctoral gown, Harvard's crimson, Columbia's dark blue, and Emory's blue and gold are a few that may be seen in the procession.

The hood varies for the respective degrees, the doctor's hood being longer and fuller than the master's. The field of study can be determined from the velvet facing on the hood according to the following color scheme: white, the arts; gold-yellow, science; purple, law; apricot, nursing; green, medicine; teal, physical therapy; scarlet, theology; salmon, public health; drab, business; and dark blue, doctors of philosophy. The hood is lined with silk in the colors of the degree-granting institution. For Emory graduates the lining is blue with a chevron of gold.

The president of Emory University wears a badge of office given to the university in 1965 by the Emory chapter, Gamma of Georgia, of Phi Beta Kappa. Designed by Eric Clements of Birmingham, England, and executed by the Worshipful Company of Goldsmiths in London, the solid gold badge is an open teardrop enclosing the raised seal of the university and is suspended on a gold chain.

UNIVERSITY AWARD RECIPIENTS

THE MARION LUTHER BRITAIN SERVICE AWARD

This award, symbolic of all honors bestowed on students by the university, is an expression of gratitude for service performed without expectation of reward or recognition. The award was established at Emory in 1942 through a bequest from a distinguished Emory alumnus, former President Brittain of the Georgia Institute of Technology.

SAMAH Z. MEGHJEE 18OX 20C
Undergraduate Brittain Award Recipient

DURING HER TIME AT EMORY, SAMAH MEGHJEE ENGAGINGLY tackled what it means to be a South Asian in a creative space and a Muslim in the South. With courage, she owned her story and encouraged those around her to do the same.

At Oxford College, Meghjee was a Conduct Board member known for being a respectful and ethical decision maker. She also served as president of the Indian Cultural Exchange, enhancing appreciation of Indian culture especially through use of social media. For her achievements at Oxford, Meghjee was awarded the 2018 Eady Sophomore Service Award.

A resident adviser on both the Oxford and Atlanta campuses, she devised engaging educational programs that brought her community closer. As a tour guide throughout her Emory career, Meghjee contributed to Emory's recruitment efforts, with many students reporting that they chose Emory after touring campus with her.

As creator and codirector of *Hearing Voices*, Meghjee contributed to improving student mental health and removing stigma. An interactive showcase of student-authored pieces, *Hearing Voices* infused gentle comedy into what can be a daunting topic. It was first presented in the living and learning spaces at Oxford. Since debuting, it has become part of the college's annual theatrical offerings.

Meghjee also was engagement chair for Emory Dark Arts—an arts club focused on student mental health. Beyond being an increasingly sought-after artist in her own right, Meghjee intentionally uses her channels to lift those around her and grant them opportunities.

Her honors thesis, the film *Bad Muslims*, diversifies the ways that Muslims are represented in Western television. Meghjee wrote, codirected, and edited *Therapist Speed Dating*, which won a Jury Award, a Silver Tripod Award for Best Story, and was one of five films—out of two thousand—nominated for a Golden Tripod Award for Best Story during Campus Movie Fest 2019.

An accomplished videographer, Meghjee put her skills to use for Emory's admission office and for the Shanti Bhavan Children's Project, a school in rural Baliganapalli, India, serving the lowest caste and providing free education and comprehensive care for more than two hundred fifty children.

Meghjee served on the Emory College Student Advisory Board, as design director of *Emory Spoke*, public relations chair of the Muslim Students Association, and a tutor with Emory Reads, teaching young Spanish-speaking children English. With each new role, she has come into more convincing view as someone unapologetic about her passions, determined in her pursuit of excellence, and fiercely committed to change where it is needed.

CODY M. LONG 20L
Graduate Brittain Award Recipient

EARLY ON, CODY LONG MADE THE DECISION TO PURSUE WITH equal vigor his studies at Emory School of Law and impassioned service to the broader university and Atlanta community.

While maintaining a high grade-point average, he served as vice president for academic affairs with Emory Law's Student Bar Association. For two years, Long also represented the Student Bar Association on the University Senate.

He was a thoughtful contributor to several key committees of the University Senate, including the Executive Committee, the Open Expression Committee, the Title IX Working Group, and the Committee on Naming Honors, whose charge is to evaluate the appropriateness of named programs and buildings at the university.

Long was active in the Latin American Law Students Association and the Lamar Inn of Court, the law school's chapter of the American Inns of Court, dedicated to supporting professionalism among lawyers. In addition, he participated in the critical work of four faculty hiring committees.

As a house director for Residence Life, he ably responded to student crises, assisted with hiring residential advisers, planned and executed educational programming, and trained in suicide prevention and sexual-assault response.

This past year, Long led the university's Graduate Student Government Association as president, fulfilling his promise to amplify student voices. Long took a number of steps to bring undergraduates and graduate students into more effective association and to create channels for more and improved student engagement with governance issues. He also initiated dialogue with the Office of the Provost to develop an interdisciplinary certificate program for graduate students, and he created a transportation working group to provide graduate students better options.

Wanting student voices to be recognized at every level of university life, Long served as a counselor to the Campus Life Committee of the Board of Trustees. He also met with the board chair, as the Presidential Selection Committee was being formed, to recommend meaningful student involvement on the committee. The Presidential Selection Committee's efforts successfully concluded recently with the naming of Emory's twenty-first president.

From the start of his law school career, Long served as a case-worker for the International Refugee Assistance Project. He helped prepare clients' applications for asylum status, conducted congressional inquiries on behalf of refugees, and connected them to non-profit resources in their host country.

Through Emory's International Humanitarian Law Clinic, Long conducted research on behalf of detainees at Guantanamo Bay, Cuba. While interning at the Georgia Asylum and Immigration Network, Long drafted applications for visas and prepared client cases for immigration court. As an extern with the DeKalb County District Attorney Special Victims Unit, he conducted research and made policy recommendations regarding survivor-defendants of intimate partner violence and human trafficking; prepared evidence, witnesses, and sentencing/bond recommendations; and argued motions on behalf of the state in criminal cases.

An inspiring role model for how to use one's education to address inequities and imbalances of power, Long never sought recognition in his own right but rather on behalf of the many communities that he energetically and compassionately represented.

THE EXEMPLARY TEACHER AWARD

Chosen by the university president from nominations by the deans on behalf of the United Methodist Church Board of Higher Education and Ministry.

DEBORAH LIPSTADT

*Dorot Professor of Modern Jewish History and Holocaust Studies
Emory College of Arts and Sciences*

DEBORAH LIPSTADT ENJOYS A WELL-DESERVED REPUTATION AS ONE of the world's foremost public scholars. Managing that level of engagement, for some scholars, can mean scaling back on teaching.

That has not been so for Lipstadt, whose greatest joy and professional satisfaction is in her encounters with students. Known as a transformational teacher, Lipstadt relishes helping young people shape their lives, challenging them, exposing them to new ideas, and learning from them in return.

As she travels the world—a leading voice for tackling the issues of race and antisemitism—she often encounters former students who acknowledge the indelible impact she has had on their lives. In 1997, she won an Emory Williams Award for her record of excellence in undergraduate teaching; in 2019, she won the George P. Cuttino Award for Excellence in Mentoring.

Lipstadt came to Emory in 1992 as an associate professor of religion and soon thereafter was named the Dorot Professor of Modern Jewish and Holocaust Studies. She founded Emory's Tam Institute for Jewish Studies and was its first director from 1998 to 2008.

Beyond Lipstadt's superb skill as a teacher, her professional and life experiences make her a fascinating figure in the classroom. She made history in her own right when she was sued for libel by David Irving, a British Holocaust denier. The case, which was filed in England and lasted six years, resulted in this summation from the *Times of London* on April 14, 2000: "History had its day in court and scored a crushing victory." Her book *History on Trial* looks back at this extraordinary time, and it provided a foundation for the 2016 feature film *Denial*.

A historical consultant to the US Holocaust Memorial Museum, Lipstadt helped design the section of the museum dedicated to the American Response to the Holocaust. She was appointed by President Bill Clinton to the United States Holocaust Memorial Council, on which she served two terms.

In a career that has seen her courageously defend free speech and call out lies disguised as facts, it is not unusual to see her testify before the US Congress. From 1996 through 1999, she served as a member of the US State Department Advisory Committee on Religious Freedom Abroad, advising Secretary of State Madeleine Albright. In 2005, President George W. Bush asked her to be part of a small delegation that represented the White House at the sixtieth anniversary of the liberation of Auschwitz. On April 11, 2011, the fiftieth anniversary of the start of the Adolf Eichmann trial, she gave a public address at the State Department on the trial's impact. In January of this year, she testified before the US Commission on International Religious Freedom.

As Lipstadt noted in a keynote address during last year's Emory-hosted conference, Academic Freedom and Free Speech on Campus: "It is in the free exchange of ideas that extremists are revealed to be what they are. We have to be the unwelcome dinner guest, not sitting silent in the face of bigotry." She has shown continuous energy and commitment to being a truth-teller in as many ways as she can—making all of us, in a sense, her students.

Lipstadt's current book, *Antisemitism: Here and Now*—which garnered a 2019 National Jewish Book Award—reflects a career spent in the classroom and great respect for the voice of her students. It unfolds as a series of conversational letters Lipstadt writes to two fictional acquaintances: an inquisitive college student and a campus colleague, composites of people she has known across

more than forty years of teaching. She just completed a year-long fellowship as the Iva Levine Invitational Scholar at the US Holocaust Memorial Museum, where she has been crafting online teaching materials to accompany the book.

Considering teaching a "privilege and responsibility," Lipstadt ascribes her success to just a few elements: "Teach something you really care about. And tell a good story, one that adheres strictly to the facts, but is told in a compelling fashion. Give it depth. And leave students with more questions than they came in with."

THE THOMAS JEFFERSON AWARD

Awarded each year to a faculty member or administrative officer for significant service to the university through personal activities, influence, and leadership.

LISA TEDESCO

*Dean, James T. Laney School of Graduate Studies
Vice Provost, Academic Affairs—Graduate Studies*

AS A RESULT OF LISA TEDESCO'S VISIONARY LEADERSHIP, LANEY Graduate School offers its more than 1,800 students in forty-plus degree programs best-of-class opportunities for interdisciplinary study, professional development, and career planning.

Since her arrival as dean in 2006, Tedesco has pioneered far-ranging, constructive change. According to her nominators, "It is now difficult to remember what the graduate school was like before Dean Tedesco arrived to lead it. Her courageous leadership has resulted in an extraordinary set of structural changes, innovative new programs, and educational infrastructure."

In her early years, Tedesco set to work creating a sustainable model for the graduate school, both financially and structurally, one on which it has continued to build with increasing success. Key achievements include bringing student stipends up to five years of support in doctoral programs and providing health insurance for graduate students.

Understanding the need for Emory's graduate students to be as competitive as possible, Tedesco pioneered finely tuned programs that now include expanded opportunities for grant writing and public scholarship for students in the humanities and social sciences; a totally redesigned system for professional development funding for research, conference attendance, skills, and language training; and a recent redesign of the Teaching Assistant Training and Teaching Opportunity program. Many of these programs have become models for other universities.

With faculty leadership, she helped create the Jones Program in Ethics to educate all graduate students in issues of research integrity. Laney Graduate School received national attention and support through grants received from the Council for Graduate Schools in 2008 and again in 2012, with the express goal of contemporary scholarly ethics and research integrity preparation for doctoral students.

Long a committed supporter of diversity and inclusion, Tedesco—along with her team—developed systematic plans and structures for the recruitment, retention, and successful matriculation of a diverse student body. Laney Graduate School created the Centennial Scholars Fellowship program, which recruits and supports the successful matriculation of scholars from historically underrepresented groups. Additionally, the Laney Graduate School leadership team facilitated the development of the Women in Natural Science Fellowship for women in certain STEM disciplines at the university and also established and expanded Emory's partnership with historically black colleges and universities and other minority-serving institutions.

During this same period of devoted service to Emory and Laney Graduate School, Tedesco has held leadership positions in virtually

every major national organization related to graduate education, including the Council of Graduate Schools, the Association of American Universities' Association of Graduate Schools, and the Graduate Record Examination board of directors.

The consensus, among all who know her, is that she simply does not rest from working to provide ever-increasing support for students and striving for greater achievement and reputation both for the graduate school and for Emory. Such a record—exemplifying a rare depth and breadth of accomplishment, impact, and devoted service—is precisely what the Thomas Jefferson Award is intended to recognize.

THE EMORY WILLIAMS AWARDS FOR DISTINGUISHED TEACHING

The university's oldest awards for teaching were established in 1972 by alumnus Emory Williams 32C. Awards in the arts and sciences are determined by a committee of Emory College faculty. Emory College gives three of these awards each year, while other schools of the university give one award.

THE CONFERRING OF DEGREES

The conferring of degrees was authorized in formal session by the Board of Trustees of Emory University on the recommendation of the president and the faculties. On May 11, 2020, Chair Robert C. Goddard III symbolically authorized President Sterk to confer degrees upon the graduates, including the recipients of honorary degrees.

HONORARY DEGREES

ALISON SINGER
*Autism Champion, Courageous Research Proponent,
Loving Mother and Sister
Doctor of Science, honoris causa*

AS RECENTLY AS 2005, AUTISM WAS VIRTUALLY UNKNOWN. SINCE then, it has emerged as a massive public health challenge. To improve life for those with the condition, Alison Singer—a sister and mother to individuals with autism—has contributed her exceptional communications skills, profound empathy, personal valor, and an unwavering commitment to science.

She knows firsthand the dark past of how society once dealt with autism. At the age of five, she would accompany her parents when they visited her brother. He was at an institution that symbolized what was wrong with America's care of its neurodevelopmentally disabled citizens. Now serving as the legal guardian for her brother, Singer works relentlessly to end the stigma associated with the condition and to ensure that those with severe symptoms receive the best care possible.

After earning an undergraduate degree in economics from Yale University and a master's degree from Harvard Business School, Singer was hired as vice president of programming for the cable division of NBC. When an NBC executive became the president of Autism Speaks, a new advocacy organization, Singer was hired as its first employee. In that role, she became the architect of one of the most effective communications campaigns in the history of public health.

In her capable hands, the organization's website became the most highly trafficked in the autism world. Through inspired media outreach, Singer did the hard work of elevating "autism" to the global vocabulary.

And she not only brought greater recognition of the condition to every corner of society, she also influenced how the prevalence rates—which are deeply affected by parents' and providers' awareness of autism—were measured. As Singer's award-winning campaigns reached underserved sectors of the community, the prevalence rate in the Hispanic community increased 110 percent and 96 percent in the African American community. Eyes were being opened to the condition, and in the process, self-advocates gained a voice to fight for their rights and insurance providers were pressured into paying for coverage of evidence-based screening.

From there, many more positive benefits resulted, including an exponential growth in funding of autism research by the National Institutes of Health; the creation of the Interagency Autism Coordinating Committee; the Combating Autism Act of 2006, signed by President George W. Bush, authorizing nearly one billion dollars in expenditures over five years; and the proliferation of Autism Speaks affiliates in many countries.

When a flawed study in the *Lancet* gave rise to the anti-vaccination movement, Singer courageously chose to become the voice of science and founded the Autism Science Foundation. Though starting small in many ways, its reach was not: Singer attracted the most distinguished investigators in autism research, including the director of the National Institutes of Health, Thomas Insel. Undeterred by public attacks from those in the anti-vaccination movement, Singer has been resolute in her commitment to foster science across disciplines, fund the best science, and ensure that junior-level investigators receive the support they need to dedicate their lives to autism research. No one has worked more effectively to neutralize counter-science trends capable of harming children and of jeopardizing one of medicine's most important achievements: vaccination.

Singer has been sought after by some of the leading academic centers of autism research, among them the Yale Child Study Center, the Seaver Center at Mount Sinai, the Marcus Autism Center at Emory and Children's Healthcare of Atlanta, and the University of North Carolina Autism Center. She is also on the external advisory board of the Centers for Disease Control and Prevention. The American Academy of Pediatrics named her an autism champion in 2012. Singer became chair of the Communications Committee of the International Society for Autism Research, the main organization for autism research in the world, and joined the International Society for Autism Research Scientific Program Committee. In 2017, she received the society's Advocate of the Year award.

The science of autism, which Singer has done so much to bolster, is successful to the extent that it is propelled by principles of benevolence, beneficence, and justice. Day to day, it can be hard to insist on these values. Singer does so in ways that will be remembered by the

next generations of families affected by autism and by the scientists, clinicians, and policymakers inspired by her and dedicated to advancing knowledge of this condition.

FRANÇOISE BARRÉ-SINOUSSE
*Groundbreaking Virologist, World Health Advocate,
Nobel Laureate
Doctor of Science, honoris causa*

FRANÇOISE BARRÉ-SINOUSSE GREW UP IN THE NINETEENTH arrondissement of Paris, fascinated by the wonders of the natural world.

While pursuing her undergraduate degree through the Faculty of Sciences at the University of Paris, she did what was unusual at the time: volunteered her services to both private and public laboratories because she wanted the assurance that she was making the right career choice.

Jean-Claude Chermann at the Institut Pasteur—whose lab was then studying the relationship between retroviruses and cancers in mice—expressed enthusiasm for the research she was doing. She earned a PhD at the Institut Pasteur and completed postdoctoral work at the National Cancer Institute in Bethesda, Maryland.

In 1982, a clinician at a Paris hospital consulted Luc Montagnier, her colleague at the Institut Pasteur, about what was known at the time as "gay-related immune deficiency," suspecting that it might be caused by a retrovirus.

Barré-Sinoussi and Montagnier were able to culture cells taken from the lymph nodes of these patients and soon after detected the enzyme reverse transcriptase—proof that they were dealing with a retrovirus. Within a year, they had made extraordinary progress isolating, amplifying, and characterizing the virus, discovering that it required fusion with T-lymphocyte cells in order to replicate.

In May 1983, they published their findings in *Science*, suggesting that the virus—which they termed lymphadenopathy-associated virus—was the causative agent of AIDS. That same month, Barré-Sinoussi came to the fabled Cold Spring Harbor Lab on the north shore of Long Island to share her insights with researchers from the National Institutes of Health and Centers for Disease Control and Prevention.

Making her career at the Institut Pasteur, Barré-Sinoussi was appointed head of the Biology of Retroviruses Unit in 1992. In addition to giving countless hours to her work in the lab, she also understood the need to see the disease in context, especially in resource-limited countries. Her visits opened our eyes to the dire conditions in which so many experienced the disease. Through her auspices, enduring exchanges were set up between young scientists in Africa and Asia and researchers in Paris.

In 2008, for their discovery of HIV, she and Montagnier earned the Nobel Prize in Physiology or Medicine. In the broad light of that immense world stage, Barré-Sinoussi—in her Nobel Lecture—was as much prospective about next steps as she was retrospective about her enormous role in advancing the science.

She was elected to the International AIDS Society Governing Council in 2006 and served as president from 2012 to 2014. Barré-Sinoussi proposed the International AIDS Society initiative Towards an HIV Cure, which has resulted in an international, multidisciplinary network of stakeholders to ensure the prioritization of HIV cure in the global health agenda. Advocating for increased investment and resource optimization, the initiative brings together private-sector partners and cure researchers.

As Barré-Sinoussi also recognizes and speaks about frequently, HIV can be a powerful tool for unravelling future scientific knowledge. Research on HIV has significantly contributed, for example, to understanding the delicate relationship between viruses and hosts. Continued effort to understand the complex virus also has revealed

novel cellular partners that may be involved in controlling infection. And future research on understanding the immune responses induced by HIV will provide more information on the complex cross-talk between innate and adaptive immunity.

Nearly forty years after her discovery, 38 million people around the world are still living with HIV. For someone who has achieved so much, Barré-Sinoussi does not hesitate to say that the progress, though life-changing for so many people, “is not enough.” Named one of *Time*’s 100 Women of the Year in 2020, Barré-Sinoussi sees every honor that comes her way as another opportunity to focus all of us on the work ahead.

She retired from the Institut Pasteur in 2015, but her work continues. Beyond her contributions to the International AIDS Society, Barré-Sinoussi joins expert panels at the international level and coordinates research programs in Southeast Asia, particularly Vietnam. As she correctly predicted five years ago, “I think I’m going to be very busy as a volunteer.”

BRYAN STEVENSON

Fighter for Justice, Seeker after Truth, Voice for the Unheralded Doctor of Laws, honoris causa

AFTER EARNING DEGREES FROM THE JOHN F. KENNEDY SCHOOL OF Government and Harvard Law School, Bryan Stevenson put his passion for justice into action, joining—and later directing—the Alabama arm of the Southern Center for Human Rights, which serves people impacted by the legal system in the Deep South.

When Congress eliminated funding for death-penalty defense, Stevenson took bold steps to fill that gap—founding the Equal Justice Initiative in 1989, where he has served as executive director ever since. In 1995, he was awarded a MacArthur “Genius” grant, which he funneled into the Equal Justice Initiative, guaranteeing a death-penalty defense of anyone in Alabama, the state with the highest per capita rate of death-penalty sentencing.

Stevenson is widely known for work he did as a young lawyer to free Walter McMillian of a crime he did not commit—a story told in his award-winning book, *Just Mercy*, which became a 2019 film. One irony of McMillian’s case was that it took place in Monroeville, Alabama, where Harper Lee grew up and wrote *To Kill a Mockingbird*. When Stevenson arrived to take on the case of McMillian—who, he says, was “obviously innocent”—and found a community proud of the ideals in Lee’s fiction, he acknowledges that “the disconnect was important for me to explore.”

During more than three decades of inspired leadership at the helm of the Equal Justice Initiative, Stevenson has brought greater fairness and equity to the legal system, documenting widespread racial bias in the administration of the death penalty and challenging racial discrimination in areas such as jury selection and sentencing.

Of the 167 people released from death row since 1973, the Equal Justice Initiative is responsible for more than 135 of those exonerations. One such individual, Anthony Ray Hinton, works for the Equal Justice Initiative as a community educator after spending nearly thirty years on Alabama’s death row. “This is the beautiful part of my work,” says Stevenson, “when we can see redemption on display in the lives of people who finally have won their freedom.”

Time and again, Stevenson has stood up for vulnerable people facing execution, including those with mental illness. Care for the welfare of children also has been central to Stevenson’s work. In *Miller v. Alabama*, the US Supreme Court sided with the Equal Justice Initiative, striking down mandatory life-without-parole sentences for all children seventeen or younger. As a result, more than a thousand people have been resentenced, and hundreds have been released.

Believing there is nothing “inherently purposeful or valuable about incarceration,” Stevenson uses his platform as an acclaimed human rights lawyer and activist to spearhead meaningful dialogue about

reducing the US prison population by half in the next decade. While never losing sight of this goal, Stevenson and his team daily file lawsuits and complaints about conditions in Alabama’s prisons, the nation’s most deadly and overcrowded system.

Stevenson also led the creation of two nationally acclaimed cultural sites that opened in Montgomery in 2018: the Legacy Museum and the National Memorial for Peace and Justice.

He is the recipient of numerous awards, including the ABA Medal, the American Bar Association’s highest honor; the National Medal of Liberty from the American Civil Liberties Union; and the Martin Luther King Jr. Nonviolent Peace Prize from the King Center in Atlanta, among others. He serves as professor of law at the New York University School of Law.

He pursues difficult work with hope, but he also does not hesitate to bring all that he can to the fight, believing that “justice only comes when we do uncomfortable things.”
